DEAR VEPABINS
DEALER,

In front of you you find our latest catalogue full of inspiration. Despite the fact that you can find the current information now through our website, we did not want to withhold you our new catalog. We hope that by browsing through this guide both you and your client will be inspired and the many possibilities with our wide range will become clear. Vepa Bins has been over the years become “One Stop Shop”.

In addition to the products for waste collection, we also have a great assortment of waste bags, wardrobe systems, artificial plants, mailboxes, office supplies and interior care products. You will also find the full range of Procter & Gamble with the known brands such as: Dreft, Ariel, Mr. Clean etc .. In short, a complete range of products that are indispensable for every company.

You the dealer, can take advantage of this by combining orders, so that you can easily reach the delivered order value and we can deliver to your customer at no extra cost, or even directly (from your name).

Thanks to our warehouse of more than 30,000m2, our own transport, but certainly also our strongly growing parcel service department, we stand for fast, reliable deliveries.

People sometimes say “it’s all in the name”. This is certainly the case at Vepa Bins, the “Bins”are still our main product group: waste bins for indoor and / or outdoor use, bins for separate collection, design and / or functional.

You will find it all within our range. Vepa Bins has many own products which are produced exclusively by various production partners as well as products from various A brands, such as: Rubbermaid, Simplehuman, Brabantia etc .. Our own design brand EKO is also extensively covered in this new catalogue.

You can use this guide as a sales tool towards your customers and remember that a waste bin is a nice product to sell; relatively simple, needs no instruction, and is needed everywhere!

Good luck with the sale!

Our distribution centre in Den Helder has more than 50,000 pallet places! This allows us to deliver (almost) all our products quickly from stock. We deliver throughout the Netherlands and Belgium via a package services or with our fleet of 40 trucks. And other European countries are served by our reliable logistics partners.

Our primary product group is waste bins. Others product ranges include; **cloakroom systems, artificial plants, letterboxes, office supplies** and **interior care products**.

In addition, Vepa Bins is official distributor of **Procter & Gamble**, which further strengthens the "One Stop Shop" principle.

We have several locations in Holland where products are made exclusive for Vepa Bins. In addition we have reliable relationships with our production partners in Eastern Europe and Asia.

We hope that this catalogue will generate plenty of business for your organisation and we wish you success in your sales activities.

V-PART

This usually concerns the steel products which are produced exclusively for us (mostly at our production partners in Asia). Examples are: self extinguishing paper bins (all sizes, all colors), ash trays, mailboxes, smoke solutions, sorting racks, bookends etc .. In a number of cases we have developed these products, we own the molds (design rights) and / or do we have the certifications (o.a. TÜV).

V-PART

CATALOGUE INFORMATION

Vepa Bins is well known for 30 years as the specialist in rubbish bins. We have grown into a specialist with the widest range in Europe. As a family business we are very involved in the region, which means that our head office and warehouse are still in Den Helder. Sales activities are now taking place throughout Europe with the focus on BeNeLux, France and Germany.

OWN BRAND VEPA BINS

In addition to our own design brand EKO, Vepa Bins also has two own B2B brands: V-Part and Dutch Design. In contrast to the EKO brand, these products come not in full color (retail) packaging, but in a simple, solid (brown) box.

HIGH-QUALITY MATERIALS

Our production partners use high-quality materials. In addition to steel, many products are made from aluminum or stainless steel.

Characteristics of aluminum are: light, corrosion-resistant, recyclable. Aluminum products can therefore be easily moved and are ideal for use in humid environments; such as toilet, bathroom or outdoor use. Examples of these products are our Dutch Design products, including the Carro waste bins".

Characteristic of stainless steel is that the material is well-resistant against corrosion. Depending on the conditions (for example on the coast in a salty environment) surface corrosion can always occur. Normally this is easily removed by regular cleaning (using a stainless steel cleaner). Deep corrosion is only possible during long-term exposure to chemicals or aggressive cleaning products.

DUTCH DESIGN

It's all in the name; these products have been developed in the Netherlands and are still produced in the Netherlands. The products are characterized by the excellent quality and by using the best materials (mostly aluminum and / or stainless steel). The production takes place at a manufacturer which has been a supplier since the first hour. This proves that Vepa Bins is built on partnerships; both with suppliers and with dealers!

**DUTCH
design**

THE COLLABORATION IS CENTRAL, THE AIM IS PARTNERSHIP

Vepa Bins maintains a strict dealer policy and acts as a reliable partner for its dealers / distributors. The distributors range from wholesalers in cleaning, catering or office supplies to project designers, retail and e-commerce companies.

Partnership is central; both in the relationship with the dealers and with the suppliers. The collaboration with dealers is becoming increasingly important due to the fact that the dealer has an increasingly broader portfolio of products and simply can no longer know ‘everything’ about the Vepa Bins range.

The final-user is becoming increasingly demanding and wants to be properly advised. The final user demands more and more customization, especially in the area of waste separation. By looking for cooperation with the dealers and engaging with the end user, the right product is selected (whether or not customized) with a satisfied customer as a result. Vepa Bins is selective in entering into new dealer relationships.

TRUSTWORTHY PARTNER
WITH A STRICT
DEALER POLICY

Vepa Bins is selective in entering into new dealer relationships. The cooperation is of great importance; the aim is partnership. To become a dealer, we request you to complete the customer form and return it with a copy of the registration of the Chamber of Commerce. We take your application seriously. As a dealer (customer) of Vepa Bins you will receive a login with your customer number for the protected part of our website where you can find additional information and our prices.

SPECIALIST KNOWLEDGE

In addition to advice on a suitable range and trends, we can also inform you about all kinds of waste issues, such as separate waste collection and waste management. In addition. In addition compiling the right assortment for one certain branch or shopping aisle and a concept for a shelf plan for a store is our expertise.

Our ICT and logistics department will help our consultants with the specialist questions you have on these areas. With more than 100 of our clients we have realized various solutions and links, with our first focus on international uniform standards. Our team of specialists is at your service for customized advice and service!

PERSONAL ADVICE

Within Vepabins several Commercial Advisers are willing to assist you. With a lot of knowledge of the different products we also understand the several Markets and Branches. We try to anticipate as soon as possible in all kind of trends and developments in the Go-to-MaArket and Sales Channels.

We will gladly discuss with you your wishes and needs for all kind of waste solutions, on which we can make a right and winning selection from our extensive product range. And also the possibilities for additional logistic services. We always want to support you in your sales proces to propose a “winning offer” to your Customers. A joint Customer visit can be aranged as well.

BUSINESS SOCIAL COMPLIANCE INITIATIVE

Vepa Bins joined the international Business Social Compliance Initiative (BSCI) from the Foreign Trade Association (FTA). BSCI is a business-driven initiative for companies committed to improving working conditions in the global supply chain. BSCI unites hundreds of companies around one common Code of Conduct and supports them in their efforts to build an ethical supply chain.

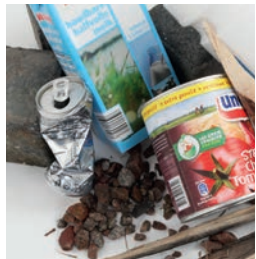

BSCI Code of Conduct is built on the most important international Conventions protecting workers’ rights, notably the ILO Conventions and recommendations. As BSCI participant, we commit to implement the Code in our supply chains.

WASTE BAGS - WASTE STREAM

In this catalogue you will see a specifications table next to each waste bin indicating the most appropriate bin liner bag.

●●○
Standard bin liner suited for light to medium weight waste

●●●
Extra-strong bin liner suited for heavy waste

RUBBERMAID

work smarter

The professional products of our partner Rubbermaid serve the convenience of your organization. The functional, solid and easy products to used are offered in the following segments:

- cleaning

- transport
- food and waste management.

SIMPLEHUMAN

tools for efficient living

Our partner Simplehuman thinks highly of efficiency. Besides all products are efficient ergonomic, easy to clean they and made to last for years.

The many integrated innovations and modern design make the products a statement of our time.

PARTNERS

FROM VEPABINS

Vepa Bins can supply any product from its partners. There is a selection in this catalog. But you will find a wider range on our website (www.vepabins.com).

If you can't find an article, please contact us via +31 (0) 223 66 83 83 and / or sales@vepabins.nl.

BRABANTIA

designed for living

Our partner Brabantia is a specialist in the field of waste collection and aims to make life more beautiful through (pastel) colors and with beautifully designed products concepts that are pleasant to use. Products made with passion and consideration for the user and the environment.

A large number of Brabantia articles are Cradle to Cradle certified, which stands for a business concept for innovation and quality.

WESCO

tradition, design and quality

Our partner Westermann & Co stands for metalworking according to the classic thoughts; a combination of excellent German quality, exclusive design (American influences), high-tech functionality and durability.

Well-known Wesco products are the 'Pushboy and Friends' a collection available in a wide range of colors.

EKO

sensible eco living

Our own brand EKO offers you a beautiful design waste bins for a sharp price. All our products are equally stylish and developed with care.

The pedal bins usually have many added features such as finger print proof coating and soft closing lid.

Many models are suitable for separate waste collection."

NEW RANGE OF PRODUCTS

CONTINUOUS IN SEARCH FOR NEW SOLUTIONS

As you can expect from the largest waste bin specialist, Vepa Bins is continuously updating its range and adapting it to the requirements and wishes of the clients and consumers. But also social developments in the area of sustainability, the separation of waste collection, challenge our suppliers to come up with new innovative products. We are happy to include them in our range, so that you can always contact us for a suitable solution for your customers.

In addition to functionality, we always look at practical use and design. From industrial products (suitable for intensive use) to design products, for the office or even at home. For both inside and outside. We keep our range up to date.

View our new products that are not yet in this catalog on www.vepabins.com

BUSINESS TO BUSINESS

HOME / BUSINESS TO BUSINESS

Vepa Bins ruim 30 jaar specialist in afvalsystemen

Vepa Bins is al ruim 30 jaar specialist in afvalsystemen. Als familieonderneming begonnen met de verkoop van afvalbakken uit huis, tegenwoordig opererend vanuit een eigen bedrijfspand met meer dan 30.000 m2 magazijnruimte. Daarmee is Vepa Bins uitgegroeid tot de grootste, meest veelzijdige, aanbieder van afvalbakken in Europa. Als familiebedrijf zijn wij er op gericht een sterke en langdurige relatie op te bouwen met onze klanten. Daarbij staan uw wensen en belangen én die van uw klanten voorop. Vanuit

RecycloStar waste separation unit equipped with a custom made text.

Complete with colored stickers provide text to indicate the waste streams. After consultation it is also possible to adjust the text and color of these stickers

The DropPit

A DropPit Ashtray with a screen provided with your own logo, message or corporate identity!

The DropPit is extremely suitable for the entrance of public facilities, schools, hospitals, sports venues, catering establishments and business premises.

CUSTOM MADE

ANOTHER CUSTOMIZED REQUEST?

You find a suitable product in our range, but it must be slightly different. Many products become standard delivered, but for certain products we can offer "customization" in relation to the requirements and wishes of your customer.

CUSTOMIZATION

- Multiple waste streams at the recycling units, such as the RecycloStar
- Different colors or color combinations
- Stickers to indicate waste flows
- Personalized sleeves, wraps or stickers on certain products
- Small adjustments
- to the product itself

DESIGN

In case of a specific sticker, you can provide us with a design, but it is also possible that we can make a design for you

WASTE BINS

PRACTICAL AND STYLISH SOLUTIONS TO COLLECT WASTE. FROM THE HOUSE-GARDEN-AND-KITCHEN WASTE OR FOR PROFESSIONAL USE

For indoor use, from A-brand to our own brand EKO. You will find it all in this chapter. Solutions for various application and with different functionalities. Both design solutions from stainless steel and inexpensive practical plastic solutions.

WASTE IS VALUABLE

Waste contains many valuable materials that can be reused. Sometimes you can reuse something entirely. Other types of waste are disassembled so that the materials can be reused separately. The waste that can not be recycled is almost all shipped to the incinerator (waste energy plant). The combustion provides energy for electricity or district heating. The remains that remain after incineration (which we call 'slag') can be used in part for the construction of roads. Less than half a percent of household waste (for example non-recyclable construction and demolition waste) is deposited; that happens in a responsible way.

PREVENT WASTE

Producing less waste is good for the environment, even better than recycling waste. You save raw materials and energy. Every day we produce around one and a half kilos of waste per person in the Netherlands. And even though we recycle a large part of that, it is better for the environment to reduce the amount of waste.

Waste bin Sort & Go, Brabantia
Plastic waste bin with sturdy handle and stay-open lid. Ideal for separating waste. Compact and space-saving. Can be placed separately in the kitchen, but can also be attached to the wall via the included wall holder. Easy to assemble. The lid falls over the edge, leaving the waste bag out of sight. Easy to empty thanks to handle at the bottom.

9
Sanibin
Stylish, eclipse-shaped plastic waste bin for sanitary rooms. The lid can be opened either by hand or by pedal. Modern and discreet design with hygienic lid, that keeps the content out of sight. The lateral opening increases the capacity and reduces the risk of blockage of the waste that is already in the container. The glossy finish can easily be cleaned and is resistant to regular cleaning and wear without loss of brightness. Equipped with a handle that makes it possible to carry 4 Sanibins at the same time (for emptying). Extremely suitable for narrow (toilet) rooms.

Capacity:	20.0 ltr	
Dimensions:	L 16, W 51.5, H 54.5 cm	
Waste bags:	●●○ 48100444

H A N D S - F R E E PEDAL BINS

HYGIENE AND ERGONOMIC IN USE.

Equipped with (soft) lid to reduce the spread of pathogens and odors through the air.

Hands-free operation of a waste bin reduces the chance of cross-contamination. The pedal ensures hygienic use of a waste bin (in accordance with HACCP guidelines).

In addition to our professional pedal bins for kitchens and the healthcare sector, we also carry a wide range of design pedal bins from various brands.

1 Baseboy Soft, Wesco

Retro classic in the design of the 1950s. With an extremely stable foot and robust pedal mechanism. The built-in damper system ensures smooth closing of the lid. The Baseboy features a sturdy rubber bottom ring and a metal inner liner.

 **brabantia**

LET'S
CLEAN
IT UP

Pedal bin newIcon, Brabantia
Pedal bin with removable plastic inner liner. Thanks to the unique soft-closing technique, the lid closes smoothly and quietly. Provided with anti-slip bottom that protects the floor and ensures that the pedal bin stands stable.

 **brabantia**

FlatBack Pedal Bin, Brabantia
Space-saving pedal bin with Silent lid mechanism and a plastic inner bucket.

Thanks to its special hinges and soft belt handle this bin can be placed by a wall or cabinet without loss of extra floor space or fear of scratching neighboring surfaces.

1 Intelligent Waste Titan

Stylish pedal bin with built-in, hygienic waste compaction system that pushes the waste into the bin. This allows up to 3x as much waste and the waste bag has to be replaced less often.

Titan's patented mechanism ensures that the waste is compressed by simple operation of the handle without direct contact with the waste. Provided with sturdy pedal and integrated odor filter.

An environmentally friendly solution that creates a real eye-catcher in every space through the design of fingerprint proof stainless steel with plastic details.

Capacity:	30.0 ltr	
Dimensions:	L 29.2, W 39, H 68.4 cm	
Waste bags:	●●○ 20300277	
Optional:	Totem odour filter (2 pack), 2030 0055

Step-On Classic container, Rubbermaid

Rugged polyethylene container with silent pedal for intensive use. This strong, leak-proof pedal bucket of plastic will not rust, drie, split and does not peel. Ideal for disposing of waste without touching the lid. The tight closing, overlapping lid keeps odours indise.

The container has rounded edges and a smooth surfaces for easy cleaning and disinfection. These containers assist you in complying to the HACCP guidelines.

Step-On Best, Rubbermaid

Rubbermaid's Step-On Best is the ideal solution and provides a number of ways to avoid musculoskeletal disorders (MSDs). Easy emptying. Front-opening to avoid lifting of potentially heavy waste bags. Easy-grips for improved control and transport. Comes with soft-closing lid and stainless steel sack holder. Rounded corners and smooth contours for easy cleaning.

Waste bin especially suitable for paper, that is possible! You can easily throw your old paper into the paper tray thanks to the open top.

The paper bin does not have an inner bin what makes emptying and cleaning a piece of cake.

This makes the paper bin very suitable for example underneath your desk.

RECYCLE

This Rubbermaid waste bin is ideal for recycling waste. Place it at a central point in your office or simply under your desk.

The bright blue color of the waste bin with the white recycling sign ensures that there is no confusion about the purpose of your trash and makes recycling a piece of cake.

Thanks to the durable polyethylene material, you do not have to worry about external damage to the waste bin such as rust or dents.

CONNECT

ASH-WASTE PAPER BINS

THE IDEAL COMBINATION OF WASTE COLLECTION WITH SMOKE MANAGEMENT

A neat total solution for every entrance.
With a rain cover for outdoor use or
without for inside or under a roof.

With the purchase of an ash-paper bin you
avoid an ashtray full of waste or a waste bin
full of smoldering cigarette butts.
This ensures a tidy entrance and will prevent
waste in the waste bin to catch fire.

The standing ash-waste paper bins are
available in various models and colors.

Thanks to the built-in waste bin there is
space in addition to quenching cigarettes in
the upper part of the ash bin and to throw
away your waste underneath. The ash-paper
bin is therefore the ideal combination to
keep your entrance as clean as possible.

AIR

SMOKE SOLUTIONS

VERSATILE SOLUTIONS FOR EFFECTIVE AND EFFICIENT MANAGEMENT OF SMOKERS WASTE

Regulation ensures that smokers have to move outside or smoke in a special smoking area. It happens regularly that the cigarette butts end up on the pavement near the entrance; which of course creates a sloppy entrance.

Vepa Bins offers a variety of solutions to prevent this. For example, what do you think of the ashtray tile! The smokers who are used to throw the butts on the floor, can do this now in the DropPit.

If there are still butts next to the DropPit you can easily sweep them in it. In this chapter you will find an extensive presentation of these tiles.

Vepa Bins is of course the correct address for the known standing smoking poles and the wall mounted ashtrays.

2
The DropPit - Signal tile don't smoke
A concrete sidewalk from 30x30 cm for placing next to the DropPit ashtray sidewalk. The signal sidewalk is provides with the no smoking icon and an anti-slip layer. Using this tile you can clearly define the smoking place, for example a square. Because the signal tile is placed at the same height as the pavement tile is ideal for installation in pedestrian areas. The tile enhances the visibility and efficiency of The DropPit ashtray tile.

Dimensions:	L 30, W 30, H4.5 cm	
Colour:	Model:	Ref.nr.:
white, red	VB 709052	31709052

3
The DropPit - Signal tile
A concrete sidewalk from 30x30 cm for placing next to the DropPit ashtray sidewalk. The signal sidewalk is provides with the disposable icon and an anti-slip layer. SEPARATE WASTE RECYCLING

SUSTAINABLE AND FLEXIBLE SOLUTIONS
FOR EFFECTIVE, RESPONSIBLE
AND COST-SAVING WASTE RECYCLING

You will find many products in our catalog
for separate waste collection.
You can choose for smaller waste bins
with multiple compartments that you have
at every workplace.

But you can also choose for one central unit
in an open-plan office. The advantage of a
central unit is that you generally have less
cleaning / emptying costs. Depending on the
available space, the budget and the habits of
the users there may be a choice to consider.

Connector Bin

Fireproof recycling module of high quality aluminum with sturdy, wide pedal in accordance with HACCP guidelines. The sloping lid prevents something can be put on it. Equipped with damping system for silent closing of the lid. The sturdy door and waste bag holder with rail system ensure that the waste bag can be changed in line with health and safety regulations.

The two wheels at the rear also serve as wall spacers. The Connector Bin can be installed as stand alone unit or in series by linking several modules together using a coupling set (sold separately). Recycling set consisting of a colored handle and optional nameplate to indicate the different waste streams is as well available.

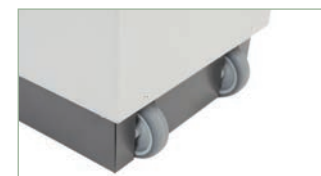

Recycling set Connector Bin

Recycling set for the the Connector Bin made from aluminum. The set consists of a handle and nameplate to indicate the different waste streams. Easy to assemble. In different colors available.

Joseph® Joseph

Intelligent Waste Totem

Recycling separation unit of powder-coated steel with a finger proof stainless steel lid including touch system. The bin has a waste compartment with a drawer underneath (capacity 24-litre). The compartment has a removable divider which makes it suitable for multipurpose use for separation of various waste items. The drawer is extendable which enables easy access when the waste bag needs to be replaced. Integrated odour filter in the lid. Custom-fit waste bags and odour filters separately available. Suitable for domestic use.

Large compartment of 36 litres with inner box and removable food waste container (4 litres).

De la with inner box has a capacity of 24 liters.

RECYCLING PROGRAM

The Netherlands produces 60 billion kilos waste every year. Waste is everywhere. We do a lot to process the waste stream in a responsible manner. Waste management is an ever-increasing role within companies.

Waste prevention, cheaper disposal of waste and waste separation can no longer be ignored within every sustainable organization. More and more companies are striving for a high level of waste separation percentage for the purpose of one significant volume reduction of the flow residual waste.

After all, this is the most expensive flow to dispose of and reduction of residual waste creates one clear decrease in the disposal costs. Besides this cost advantage waste separation creates awareness within a sustainable organization and this also exudes a certain amount Corporate Social Responsibility.

By waste separation, certain waste materials can be reused; this saves raw materials and energy. As a result of this there are less adverse environmental effects because there is less waste to be incinerated or landfilled, so less CO2 emissions.

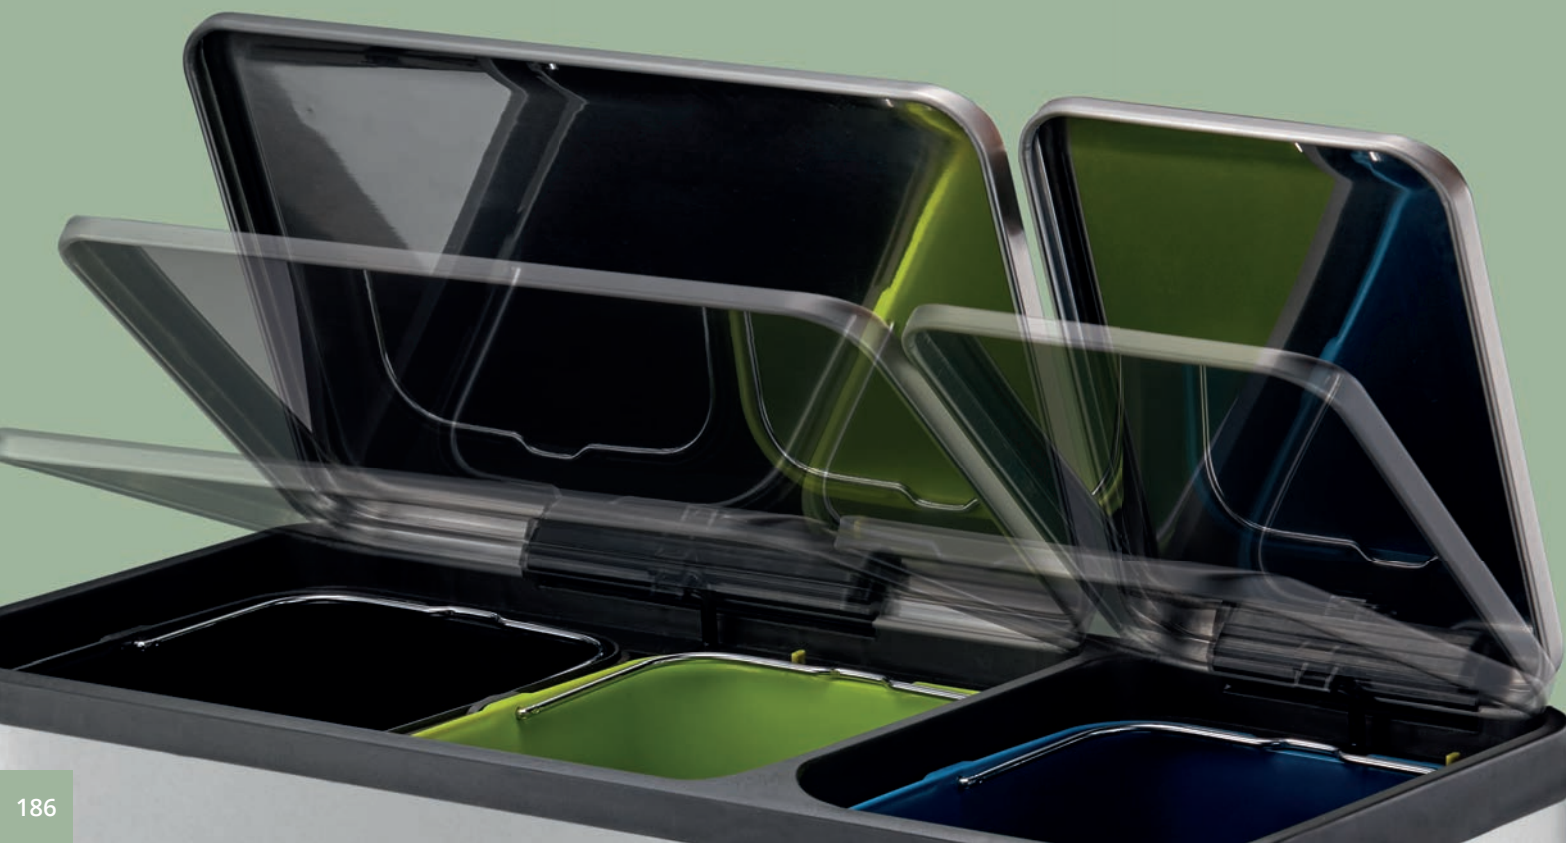

If you wish to implement multi-stream recycling in your organisation, consider these 4 important steps:

1. Analyse the needs: Which waste streams need to be collected? Establish the milestones; cost reduction,
2. company appearance and / or realization of adverse environmental effects.
3. Choose the right products and implement recycling.
4. Communication to staff and cleaning personnel.
5. A successful recycling programme depends on front-line participation.

TIP: Map for a regular month the amount of waste within your company, apply the waste separation and determine how much you can reduce the amount of residual waste. You can use this information when you enter the conversation with your waste collector and see how much money you can save if the waste is all ready separated

If you require more information regarding implementation of a recycling programme or would like specialised advice, feel free to contact us.

brabantia

Waste bin Sort & Go, Brabantia

Plastic waste bin with sturdy handle and stay-open lid. Ideal for separating waste. Compact and space-saving. Can be placed separately in the kitchen, but can also be attached to the wall via the included wall holder. Easy to assemble. The lid falls over the edge, leaving the waste bag out of sight. Easy to empty thanks to handle at the bottom.

Installation bin Sort & Go, Brabantia

Built-in frame and two plastic waste buckets with sturdy handle and stay-open lid. The easy to install mounting frame is self-supporting so that the door (hinges) is not burdened extra. Suitable for both left and right turning doors (minimum installation space: H 430 x W 550 x D 360 mm). Ideal for separating waste. Compact and space-saving. The waste bins are optimally accessible when the box is opened because the unit rotates outwards. The lid falls over the edge, leaving the waste bag out of sight. Easy to empty thanks to handle at the bottom.

5 Pedal Bin Rectangular with Liner Pocket 24+34 litres, Simplehuman

Beautiful shaped pedal bin made of stainless steel with Liner Pocket waste bag dispenser system on one side, keeping waste bags always within reach and you can easily change the waste bag. The stainless steel edge clamps the waste bag so that it stays neatly in place and out of sight. The other side has a plastic inner liner with handle for easy emptying. Equipped with sturdy, wide steel pedal and damped closing lid.

Capacity:	58.0 ltr

5

6 Rectangular Recycler, Simplehuman

Neatly sort trash and recycling all in one integrated can. Our fingerprint-proof rectangular recycler has two color-coded liners (30 litres and 16 litres), and has a wide, durable all-steel pedal for easy-access. A slim profile hinge allows for a flush fit against the wall, and our patented lid shox® technology controls the motion of the lid for a slow, silent close.

3

Butterfly Recycler 2 x 20 litres, Simplehuman

The butterfly recycler's twin liners (2 x 20 litres) make it easier to separate trash. The space-saving butterfly design fits in tight spaces with a slim footprint and split open doors to fit underneath low countertops.

A solid steel pedal provides superior durability, and a rotary damper allows the trash can lid to close slowly and quietly. Integrated toe-kick and non-skid base.

1

Slim Jim Step On container Front Step recycling, Rubbermaid

The Step On-containers do make maximal profit of available space because of their slim and discrete design. Perfectly fits tight to the wall. The stainless steel container has artificial accents and equipped with silent closing cover and two separate liners. The pedal of industrial quality guarantees a long life period.

H A P P Y

STRONG AND DURABLE

Smiley Face Bin 52 liters

Cheerful waste bin made of UV-resistant rotational molded medium density polyethylene (MDPE) with face on the colored lid. Various variants, for different waste streams. Very strong and yet lightweight, making it easy to handle. The lid keeps the waste bag out of sight. Due to the size and design, it is extremely suitable for encouraging children to separate waste. Ideal for use in e.g. schools, nurseries and playgroups.

P E T m a n

GROOT EN CREATIEF RECYCLEN

PETman

Large waste bin made of high-quality plastic for the collection of (PET) bottles. With its striking appearance, the PETman bottle encourages separate waste collection of bottles. Matching waste bags keep the inside clean. Wrap separately available (and can be personalized from 5 pieces). An ideal solution for events, catering, festivals and sports clubs. In case of outdoor use it is advisable to increase the weight of the PETman. Available in different (standard) colors. Other colors on request.

Wrap for PETman

Eye-catching wrap to encourage the public to collect and recycle (PET) bottles. Personalized wrap already available from 5 pieces. Ask for the conditions.

Waste bags for PETman/CANman/TRASHman

Large volume waste bags especially for the PETman, CANman and TRASHman waste bins.

Omniversum

FLEXIBLE WASTE BAG HOLDERS

MULTIFUNCTIONALLY FROM RECREATIONAL TO HEALTH SECTOR AND FROM INDUSTRIAL ENVIRONMENT TO OUTSIDE SURROUNDINGS.

In particular our Saekko Boy is an eye-catcher within this range. These waste bag holders are available in many different varieties. Both with and without lid, various sizes and two models with foot pedal. These waste bag holders are very suitable for professional use, for example in the health care.

The benefits of bagholders are that they are in general cheaper than dense waste bins (less material) and they are perfectly suitable for waste separation through use of waste bags with different colors.

Within this category we also present diverse range from foldable bag holders for many purposes, at the camp ground to heavy-duty models for industrial or exterior use.

NICE AND TIDY WITH FLEXTRASH!

The Flexible Waste Bin

Flexible, durable waste bag holder with ABS plastic lid and cover bag made from recycled PET bottles. The ideal waste solution for at the desk or on the wall in the office or in small rooms such as the bathroom.

The cover bag is flame retardant and is made from recycled PET bottles. Includes a biodegradable trashbag. By making use of these perfectly fitting waste bags, the inside of the cover bag stays clean and if the cover bag is dirty, it is washable in the washing machine.

Various clips for easy mounting to be ordered separately.

DURABLE EXTERIOR WASTE BINS

KEEPS THE STREET CLEAN

We would like to introduce, a very nice line of robust, solid outdoor waste bins from the BINsystem brand. Let us surprise you by quality, versatility and functionality of this brand.

In addition to these powder-coated steel products we have a extensive range (new) plastic outdoor bins.

From free-standing to floor secured, or poll/gate mounted, we have the right solution for every location.

KEEP THE STREETS CLEAN FROM LITTER

Littering causes a lot of annoyance.

It attracts vermin and cleaning costs hundreds of millions euros per year. Litter is bad for nature, animals and humans. It takes a long time before litter is broken down, even natural waste such as a banana peel remains for a long time. Some substances, such as glass and plastic, do not even break off at all.

In addition, a lot of litter is difficult to clean up, for example because it is not easily attainable (with benches, poles and in the green), or it is sticks (chewing gum) or it is crushed in the ground (cigarette butts). In short: litter remains in the environment for a long time.

The most important step in the approach to litter is: place public waste bins and empty them in time

Clean is clean

Keeping it clean on a regular basis is the best method for a place free of litter.

With a well thought-out waste bin you keep the environment cleaner.

TIPS FOR EFFECTIVE WASTE BINS:

1. Fresh colors work best.
2. Increase the findability.
3. Communicate the desired behavior on the bin.
4. Use symbols and images on the bin.
5. Adjust the size to the usage.
6. Provide a clean waste bin and empty it in time.

Rubbish Bin Cibeles 50 L

Exterior rubbish bin made from UV-resistant HDPE. This bin can be wall or poll mounted. The lid protects from rain water accumulation and overflowing rubbish.

Also includes an ashtray in the cover. The bin can be removed entirely from mount by unlocking with a triangular key.

The integrated front hand grip makes emptying easy. The ondulated style lines discourage vandalism (graffiti).

Cibeles 50 L Waste Bin with Bag Dispenser

Nothing is more annoying than dog owners lack the decency to clean up dog sod. Fortunately, a turnaround is slowly going on and we see more and more owners who neatly clean up the great message of their four-legged friend.

WASTE BAGS - WASTE STREAM

In this catalogue you will see a specifications table next to each waste bin indicating the most appropriate bin liner bag.

●●○
Standard bin liner suited for light to medium weight waste

●●●●
Extra-strong bin liner suited for heavy waste

PERFECT FIT

RELIABLE, CONSISTENT QUALITY OF MATERIALS AND SIZE

Which waste bag do I need, or even the other way around: I have this waste bag, which container wil fit? These are questions that many users ask themselves. The answer lies in the size, so the size of the bag and the size of the (inner) bin. Only when this is clear you can look for the desired material, the required thickness and color.

WHICH MATERIAL?

Vepa Bins has a broad range in bin bags of many different materials, a statement below:

LDPE	Low Density Polyethyleen These bin bags with a low molecular density are characterized by the fact that they are less likely to tear further when the bag has been puncture or teared. Acytually it is easier to puncture and rip due to the low puncture resistance property.
HDPE	High Density Polyethylene These bin bags typically continue ripping once a tear has begun in the material. Nonetheless it is harder to puncture due to its high puncture resistance property.
HDK	This material combines the advantages of LDPE and HDPE. It is a material reduced in thickness while maintaining the standard HDPE and LDPE qualities. Benefits: <ul style="list-style-type: none">• competitive price due to limited thickness• 1A material; a consistent qualit compared to recycled materials• good sealability• a larger box capacity due to thinner thickness, resulting in less transport and storage costs• very high tensile strength and stiffness• very high puncture resistance
Regenerate	This concerns recycled material. In general, these bin bags are thicker; this is also necessary to make them sturdy. These bags often have a clear plastic odour and when you hold them against the light you can see the pollution (grains). These bags must therefore be thicker than bags of virgin material in order to maintain the same qualities.

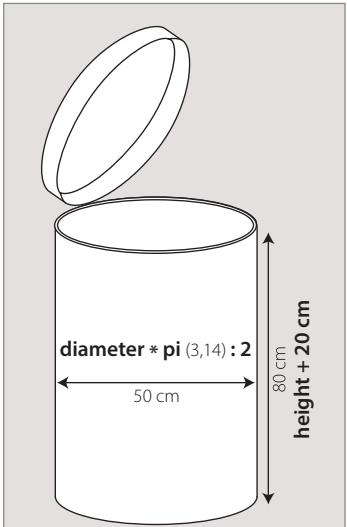

WHAT SIZE?

When there is a square or rectangular waste bin, the length plus the width of the tray gives the minimum required width of the waste bag. For the height of the waste bag, take the height of the container plus 20 cm.

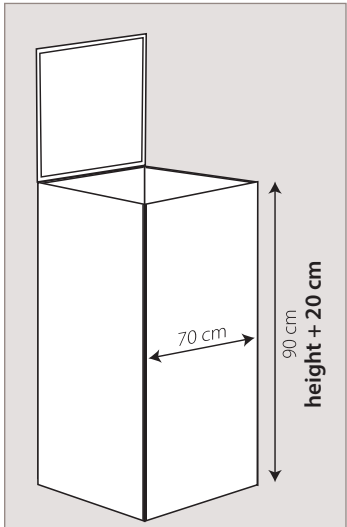

For a round waste bin, multiply the diameter by pi (= 3.14) to get the perimeter of the bin. Then divide the outline by two. The outcome is the minimum required width of the waste bag. For the height of the waste bag, take the height of the container plus 20 cm.

The thickness of a waste bag is indicated in my (thousandth of a millimeter). The thickness determines the strength of the bag, but that is not all! There are various materials; a waste bag can be made of recycled material (regenerates), but also of new material (virgin).

Bags made of the new material are generally more stable (and therefore stronger).

SIZE WASTE BAG 80 x 110 cm
min. width:
50 cm * 3,14 = 157
157 : 2 = **78,5 cm**
min. height:
80 cm + 20cm = **100 cm**

SIZE WASTE BAG 70 x 110 cm
min. width:
is breedte afvalbak = **70 cm**
min. height:
90 cm + 20cm = **110 cm**

BIODEGRADABLE BIN BAGS

In addition, we have added a completely new type of bin bags to our range of biodegradable bin bags. In an environmental perspective, more and more people are choosing a bag made from starch and therefore biodegradable. Plastic is an oil product and the production of plastic bags ensures a lot of stress on our environment. From a recycling point of view, a company can choose for biodegradable bags, for example if they use biodegradable paper cups they can be collected in the special bags and presented to the collector (at a lower cost).

Our Bio Bags are compostable according to the European standard EN-13432. Currently, however, there are still 2 drawbacks to these types of bags:

- price (biodegradable bags are quite expensive)
- shelf life (limited shelf life, about 1 year after production)

In addition to all bin bags we offer a broad range of bags, or our own private label (V-Part). And you can find the 'perfect fit' bin bags from the Brabantia and Simplehuman brands.

All bin bags from Vepa Bins are reliable and made from a consistent quality of materials and size.

HYGIENE

FOOD HANDLING

HACCP PROOF, SAFE FOOD STORAGE AND COLOR-CODEED SOLUTIONS FOR INTENSIVE USE

For the hygienic storage, preparation and / or transport of food in accordance with HACCP guidelines.

In addition to an extensive own range of showcases and plastic containers you will find in this chapter a lot of (new) products from our partner Rubbermaid Commercial Products. This color coded solutions meet all European requirements and limit the risk of cross-contamination when used correctly.

HACCP is a control system for the food processing that prescribes guidelines to prevent food contamination during the food preparation and to prevent unsafe food being served and delivered.

Square container 3,8L, Rubbermaid

Container of fracture-resistant, crystal clear polycarbonate with maate designation and sturdy handles for storing food. Temperature range from -40 to 100 °C. Stackable and available in 3 sizes. Easy to wash and dry through holes in handles for water drainage. Dishwasher safe. Colored covers available separately. Complies with the HACCP guidelines and EU requirements for food contact. Indispensable in every professional kitchen.

Square container lid small, Rubbermaid

Lid for square containers of polyethylene. Available in various colors to separate uncooked foods such as raw meat, to separate from prepared foods. Leak-resistant, because the lid clicks firmly and easily opens through pull tabs at the corners. Dishwasher safe. Complies with the HACCP guidelines and EU requirements for food contact.

Preventing contamination and cross-contamination is the core of any food safety or HACPP program. One of the simplest ways to prevent cross-contamination is color coding.

This can be applied to all aspects of food safety - zone classification, cleaning and hygiene and kitchen equipment and utensils.

- 1 Easy to read size indication
- 2 Sturdy handles with holes for drainage
- 3 Pull tabs on the corners

1 Square container 3,8L, Rubbermaid

ProSave Ingredient Bin, Rubbermaid

Ingredient Bin System made from polypropylene for storage, transport and measure ingredients safely. Scoop hook system reduces cross-contamination and provides quick access.

Clear window and ingredient labels for easy identification of contents. Clasp secures lid on base, protecting the quality of ingredients. Durable, industrial-grade structural web plastic construction, smooth surfaces for easy cleaning. Casters allow the bin to be easily moved between multiple prep stations. Includes sliding top and scoop.

ProSave Safety Storage Bin, Rubbermaid

The ProSave Safety Storage Ingredient System improves safety and productivity with smaller quantities of ingredients. Lid design provides access to ingredients while stacked, on a shelf or under a prep table.

The lid allows for one-handed access. Clear windows and ingredient labels for easy identification of contents. Integrated 2 Cup Safety Portioning Scoop and hook provide dedicated scoop storage for safe ingredient portioning.

Complies with HACCP guidelines. FIFO (First In, First Out) barrier aids in proper rotation of ingredients.

EFFICIENT CLEANING

ERGONOMIC AND SPECIALIZED
SOLUTIONS FOR OPTIMAL PERFORMANCE
AND SUPERIOR CLEANING

Modern cleaning is characterized by the use of microfibre, but also for the well-known flat mop and / or strand mop system. With our partner Rubbermaid Commercial Products you are at the right place.

They offer a total range of cleaning products. Both for the periodic cleaning with cleaning carts / work carts and the quick 'in between' cleaning with, for example the Pulse System, it is all in this chapter.

Specialized Cleaning materials for a total solution within your organization for smart and efficient cleaning, exclusively and of superior quality

PRODUCTIVITY CLEANS EVERYTHING BETTER

Rubbermaid Commercial Products offers innovative solutions and proven superior performance for maintaining a healthy one and safe environment.

- Clean more square meters in less time.
- Proven lower load for the user.
- Efficient removal of micro organisms.
- Less water consumption.
- Bleach-resistant durability and more thorough cleaning.
- Color coding helps the user to avoid cross-contamination.

4 High Security Housekeeping Cart
Hotel-/Housekeeping Cart with high capacity-to-footprint ratio. Includes locking security hood and cabinet doors, with access from both sides of cart. Two heavy-duty zipped Compact Fabric Bags with waterproof PVC lining. Multiple accessories available for a customised solution.

yellow	VB 000760	76174816	

1
Invader mop holder, Rubbermaid
Mop holder and handle made of polypropylene and glass fibre for humid mops. The thumbwheel of the Invader Side Gate holder tightly clamps the mop with 12,7 cm headband.

Colour:	Model:	Ref.nr.:
■ blue	VB 000146	76146899
■ grey	VB 000146	76147353

2
Web Foot Microfibre Tube Mop, Rubbermaid

Designed to have greater floor contact and improved absorbency. Made from exceptionally fine, premium quality split microfibre that penetrates microscopic crevices where cotton and non-split microfibre cannot reach. Comes with a PVC-coated mesh headband and double-stitched tailband that improves the durability and eliminates streaking. Lasts 200 launderings with bleach in 90°C. Holds and removes 95% of contaminants.

Dimensions:	L 16.5, W 14, H 6 cm	
Colour:	Model:	Ref.nr.:
■ blue	VB 000111	76090185
■ green	VB 000812-06	76201222
■ white	VB 000111	76090161

3
Web Foot Microfibre String Mop, Rubbermaid

Highly durable and superior absorbent for extra-long mop life. Constructed with a blend of continuous filament microfibre and antimicrobial yarn. Pre-laundered and pre-shrunk. Recycled content: 21% post-industrial cotton and 28% PET plastic. With PVC-coated mesh headband and double stitched tailband for improved durability and launderability. Works with traditional wet mop handles and frames.

Colour:	Model:	Ref.nr.:
■ green	VB 000812	7619 4531

4
Web Foot microfibre tube mop, Rubbermaid

Highly durable and superior absorbent for extra-long mop life. Constructed with a blend of continuous filament microfibre. PVC-coated mesh headband for longer product life and bleach safe in laundry and use. Triple the durability and withstands three times the number of launderings of standard blend mops.

Colour:	Model:	Ref.nr.:
■ green	VB 000812-06	7620 1222

5
Cotton-end string mop, Rubbermaid

High absorbency string mop of cotton. Looped-ends and tail banding reduces tangling for like-new performance after every laundering. The 4-ply, balanced blend of cotton withstands repeated laundering without shrinkage.

Dimensions:	L 16.5, W 14, H 6 cm	
-------------	----------------------	--

Colour:	Model:	Ref.nr.:
■ white	VB 002090	51209001

6
Roll press, Rubbermaid

Durable, downwards press made of polypropylene and steel. Can be used with all flat mops. Ideal for humid mop wringing. Suitable for use in combination with bucket for Combo Bravo and Sani Duo.

Dimensions:	L 22.6, W 33.5, H 31 cm

IN THE EU YOU HAVE EVERY 3 MINUTES AN SLIDINGACCIDENT, A FALL OR A SLIP UP ,

Accidents on the shop floor result in 20% of the cases in absence for 3 days.

The costs are more than 20 billion euros per year in medical expenses, sick leave and repayment. 50% of registered accidents happen to passersby.

CARE & HYGIENE

Gillette, Venus, Aussie, Clearblue, Head & Shoulders, Olaz, Old Spice, Pampers, Fixodent, Oral-B, Always, Tampax

DE KRACHT VAN MERKEN

Vepa Bins is de officiële distributeur van de Procter & Gamble portfolio op de Nederlandse markt. Tevens is Vepa Bins commercieel verantwoordelijk voor haar afnemers. P&G staat bekend als toonaangevende fabrikant van leidende consumenten producten. De P&G merken zijn vertrouwd in miljoenen woonkamers, keukens, wasruimtes en badkamers en zijn van generatie op generatie doorgegeven.

Naast de consumenten producten verzorgt Vepa Bins tevens de distributie van de zogenaamde P&G Professional producten. Het Professional assortiment is in grote verpakkingen beschikbaar en daarom uitermate geschikt in de markt voor grootverbruik.

Of het nu gaat om enkele colli's of een aantal pallets, bij Vepa Bins bent u aan het juiste adres voor de P&G merken.
